

**MENTEE****Eneotse Isosie Unoogwu**Founder & CEO  
AlltimeFresh Ltd

Nigeria

Eneotse Isosie Unoogwu is a social entrepreneur and agribusiness innovator passionate about transforming Nigeria's fresh produce value chain. A graduate of Business Administration, she also holds a Diploma in Innovation and Entrepreneurial Finance from Kaduna Business School and several certifications in Project Management, Social Entrepreneurship, Strategic Management, and Supply Chain Development. Eneotse is recognized for her pioneering work in developing off-grid cold chain logistics solutions that combat postharvest losses, enabling perishable produce to reach markets fresh while improving farmer incomes. Through her initiatives SHEGROWS (focused on gender equity and climate-smart agriculture) and FARMTRIBE (which engages youth in agribusiness), she addresses both gender barriers and youth unemployment in agriculture. A recipient of the Women in Africa Agribusiness Award (2018), an Acumen Fellow, and a Tony Elumelu Entrepreneurship Programme alumna, she continues to empower farmers, women, and youth through innovation, training, and market inclusion.

**AlltimeFresh Ltd**

Founded in 2019, it is a for-profit social enterprise based in Nigeria that empowers smallholder farmers to become climate-smart, market-ready producers. The company operates on a farm-to-market model, addressing inefficiencies in the fresh produce value chain through block farming, off-grid solar cold storage, and direct linkages to markets. AlltimeFresh currently operates 6.5 hectares of farmland in Kano and Benue States, working with over 4,500 farmers, 82% of whom are women, and a network of 3,000 female traders. The enterprise runs 6 solar-powered cold storage units and six solar irrigation systems, reducing postharvest food losses by over 300 tonnes per year and avoiding approximately 625 tonnes of CO<sub>2</sub> emissions annually. The enterprise trains local community workers—primarily women and youth—to provide extension services. agronomic advice. and weather-smart farming support. Looking ahead.
