Sabina Marie Rose

Founder

Green Energy Technology Ltd (GET)

Rwanda

Sabina Marie Rose is a Rwandan entrepreneur and project management specialist with over six years of experience in agritech, cold-chain logistics, renewable energy, and community development. With a background in Civil Engineering and an MBA in Project Management in progress, she combines technical expertise with practical, people-centered leadership to build scalable solutions for farmers, youth, and women.

She previously served as an Entrepreneur-in-Residence at One Acre Fund's Venture Studio, where she supported the design and implementation of farmer-focused ventures, strengthening cooperatives and improving smallholder livelihoods. Sabina is passionate about integrating green energy and technology into sustainable agriculture and creating inclusive opportunities within emerging digital economies. Her work has earned recognition, including First Runner-Up in the WAYA 2025 Agritech Awards and the AYuTe Africa Challenge Rwanda. She continues to champion climate resilience, sustainability, and inclusive growth across Africa.

Green Energy Technology Ltd (GET)

Founded in November 2023 by Sabina, Green Energy Technology Ltd (GET) is a woman-led Rwandan enterprise advancing Africa's food systems through climate-smart cold-chain logistics and digital solutions. Through its brands, GET Logistics and GET It Fresh, the company provides refrigerated transport, cold storage, solar cooling, IoT monitoring, and a digital marketplace connecting farmers to regional and global buyers. By reducing post-harvest losses and improving market access, GET supports smallholder farmers with better earnings and traceable, high-quality produce. Engaging over 200 farmers, the company is building a more resilient, efficient, and sustainable agricultural value chain.
